

600 Series - 3PP		
Crack Pressure Tested (8.5 psi)		
Set Pressure	Differential Pressure	Flow Rate (cfm)
9.5	1	<5
17	2.5	<5
13.5	5	5
18.5	10	10
23.5	15	32
28.5	20	55
33.5	25	65
38.5	30	80
48.5	40	95
58.5	50	110
83.5	75	150
108.5	100	180
133.5	125	230
158.5	150	280
183.5	175	320

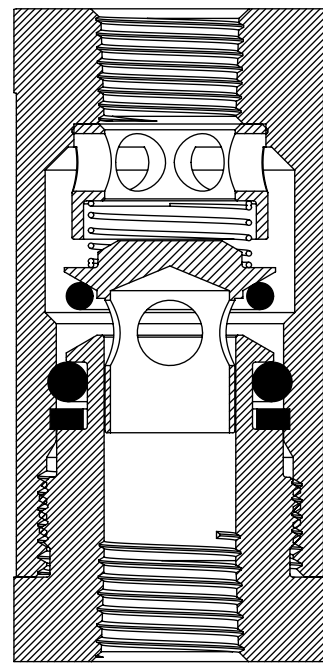

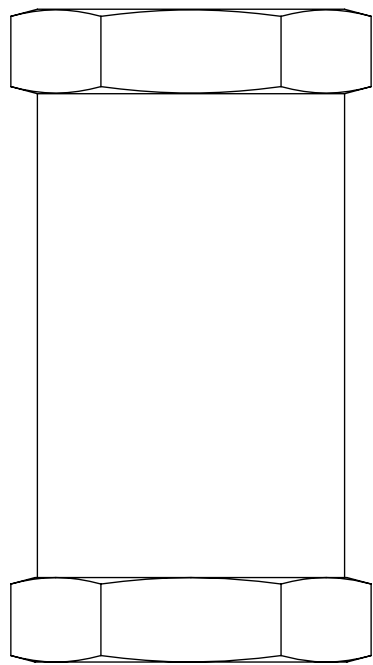

Differential Pressure is define as the change in pressure between the inlet pressure minus the crack pressure

Testing Media: Dry Air

Unit: cfm

Flow Meter: 0-600 cfm Flow Meter

Note: Valve Check Inc recommends to derate the valves to 90% of the flow data for design purposes
